MARCH SPEAKER!

JOHN MARCI

“AN INTRODUCTION TO BAMBOO FLY RODS AND THEIR USE”

John Marci is a part time collector and full time user of “attainable” Bamboo Fly Rods. During the past 4 years, John has developed an obsession with pursuing, restoring and using production bamboo fly rods produced in the United States during the 1920s through 1960s. The presentation will cover classes of attainable bamboo rods, what brands to look for, where to find them and cost estimates if pursuing your first rod.

John is a Past President, Banquet Chair, State Council Member and current fly tying instructor for Hacklebarney TU. He fishes mainly in New Jersey, New York and Maine but manages to get out west every other year. The water he fishes parallels the waters that most members cover in a season.

If you have an old rod lying around feel free to bring it along for a candid review. If you are looking to purchase your first rod, this presentation may help you avoid wasting time and money. We hope to see you at the March Meeting.

BANQUET— MARCH 20, 2010

The Chapter's Annual Fundraising Banquet is scheduled for Saturday, **March 20, 2010**, at the Lafayette House, Lafayette, NJ.

Tickets are available now! Ticket prices are: \$49 per person, \$95 per couple and \$450 for a table of 10.

We look forward to seeing you there!

- Dave King, President

WORDS TO FISH BY . . .

But when vacation came, with its annual exodus from the city, there was only one sign in the zodiac, and that was Pisces.

MARCH MEETING NOTICE

Our next chapter meeting will be held on **MARCH 17, 2010** the third Wednesday of the month, 7:30 PM at The Recreation Hall at Camp Jefferson. Take exit 34B off Route 80, to the Route 15 North exit. Travel North on Route 15 past the fourth traffic light. After the fourth light, you will pass a Pathmark Supermarket entrance on the left. At this point, be sure that you move into the right lane and take the second ramp on the right to Weldon Road (immediately after the Lake Shawnee exit ramp). This exit puts you directly onto Weldon Road, and the camp is a short distance, on your left.

FLY SWAP

Yes, it is here already.

Our March Meeting is our Annual Fly Swap.

Tie 25 of your favorite fly for the March Fly Swap.

Each fly must have a toe tag marker or other identification.

NEW JERSEY FISHING LICENSE ON-LINE

You can now get your New Jersey Fishing License On-Line! Simply go to www.njfishandwildlife.com and follow the simple prompts! Remember January is here so it is time to buy your 2010 license! Opening Day is right around the corner and with these warm days, be sure to get out and get yourself a winter trout!

BANQUET—Saturday, March 20, 2010

The Banquet has been scheduled for Saturday, **March 20, 2010**, at the Lafayette House, Lafayette, New Jersey. Need something to keep you busy this winter? Join the banquet committee and volunteer your time. It's easy and rewarding! Banquet meetings have already begun!

FLY BOX RAFFLE

The Chapter is currently selling tickets for our Fly Box. Be sure to buy some at the meeting. The raffle ticket will be pulled at the chapter's annual fundraising banquet.

FLY TYING CLASS

The Chapter's Fly Tying classes has begun on Thursday February 11, 2010 and continues for 7 consecutive Thursdays until March 25, 2010. Beginner's and Advanced classes are being offered.

MARCH SPEAKER: JOHN MARCY

John Marcy of Hacklebarney Chapter of Trout Unlimited will speak on Fishing Bamboo Rods. Be sure to come to our chapter meeting to listen to him speak, a take a look at a few of his rods.

MARCH FLY SWAP

Tie 25 of your favorite fly for the March Fly Swap. Each fly must have a toe tag

THE CHAPTER ACTIVITY FEE. WHAT'S IT FOR ANYWAY?

Here is your 2010 Chapter Activity Fee Coupon. Please fill it out completely and mail it in with your check for \$15 or bring it to the January meeting.

Your Activity Fee helps support all of our chapter activities, such as Trout in the Classroom, Education Projects, this Newsletter and Conservation Projects.

This is just a small way of offsetting some of our chapter's costs for these projects. So hurry and mail it in!

We thank you for your support!

- Ken McDonald, Treasurer

HACKELBARNEY CHAPTER

INVITES NORTH JERSEY CHAPTER

TO SALMON RIVER TRIP

The Hacklebarney Chapter is running two trips to the Salmon River.

The first is March 12 - 14 and the second is the following weekend, March 19 - 21.

The cost will be \$160 per person which will include lodging and streamside lunches on Saturday and Sunday.

Anyone from FSB interested in going should contact Kevin Gabelmann any time after February 18 at:

Kgabelmann@vzw.blackberry.net.

TROUT IN THE CLASSROOM

February 2010 TIC Program Update

Hi Folks,

Although I gave a brief update on our TIC Program at our February meeting, I'd like to take this opportunity to expand on that update, and to thank each and every one of you who have helped out with our TIC-related activities.

We currently have 21 schools participating in our TIC Programs, and next year we will be adding several more. Our "role", with regards to our TIC schools, includes helping out (upon request) with the set-up and/or maintenance/repair of their tank-related equipment, delivering the trout eggs (normally done in early-to-mid October), providing special programs upon request (e.g. "onion sack program", fly tying demonstrations, introduction to fly fishing, discussions on fishing ethics, etc.), and helping out (upon request) with fish releases (normally done in April and May).

Onion Sack Programs: For those of you who are not acquainted with the "onion sack program", it involves submerging weighted-down (or staked-down) onion sacks filled with hardwood leaves in one or more of the local streams. Various invertebrates (e.g. scuds, mayfly and/or stonefly larvae, aquatic worms, etc.) will take up residence in these onion sacks. After a minimum of two-three weeks, they are ready for "use". The day before, or the day of, giving a program, a sufficient number of onion sacks (normally 3-4 per class) are pulled by the TU member who is helping out with the program. The onion sacks are placed in a 5-gallon bucket along with enough water to keep them covered. They are then taken to the applicable school on the day of the program. In addition to delivering the sacks to the school, we also assist the teacher with the actual presentation of the program. This involves placing the contents of the onion sacks into trays and helping the students find and identify the various invertebrates that are in the leafy detritus. The requests for "onion sack

programs" (aka "invertebrate studies") have already started to come in. First choice on providing these programs will go to the folks who gave the program to the applicable school last year. If they are unable to provide the program, a request for volunteers will be sent to all of our members via email. If you are considering volunteering but are concerned that, like me, you are not "invertebrate savvy", I have several illustrated easy-to-follow keys for indentifying the most common types of invertebrates that are found during these onion sack programs.

Fish Releases: Requests for assistance with fish releases have also started to come in. Here again, first choice on helping out will go to the folks who delivered the eggs to the applicable school(s) last fall. If they are unable to meet the need, a request for volunteers will be sent to all of our members via email.

Upcoming Special TIC Field Day: We have been asked, by Allamuchy Township's fourth grade TIC class teacher, to provide volunteers for a special TIC Field Day Program that will be held on Thursday, May 27, with a rain date of Friday May 28. The Field Day will be held at the **Mountain Villa** just off of Route 517 (used to be the **Villa Madonna**) outside of Hackettstown. There will be approximately 45 students participating in the Field Day. As currently envisioned, our "role" will involve providing enough volunteers to oversee and staff three "stations"; **invertebrate studies** (Brian Cowden has already volunteered to oversee this station), **introduction to fly fishing**, and **introduction to fly tying**. We need two volunteers to develop the specifics for, and to oversee, the latter two stations (i.e. **introduction to fly fishing**, and **introduction to fly tying**). In addition, we need several volunteers to help out with each station. Due to the fact that the Field Day will be held on a Thursday with a rain date of Friday, I realize that those of you who work full time may not be able to volunteer, but I am asking that any of you who can volunteer to please send me an email as soon as possible so that we can start to build our "volunteer listing". If you can oversee one of the aforementioned stations, please include that information in your email.

THANKS AGAIN!

Doug Riley
TIC Coordinator
NNJ (Fred S. Burroughs)
Chapter T/U

ANNUAL MUSKY CLEAN UP

- **What?** TU and the Musconetcong Watershed Association are spearheading our annual river clean up around Earth Day celebrations.
- **Who?** TU volunteers, friends, neighbors, Scouts, church groups, all are welcome to help out! We had more than 400 volunteers last year and aim for 500 this year.
- **When?** Saturday, April 17th 9am – noon.
- **Where?** San Bar Park/Alumni Field in Hackettstown which is off Willow Ave. about 250 yards north on Willow from main street/route 46. Turn off rt. 46 onto Willow just before the intersection of routes 46 and 182 (if traveling East) and just after that intersection if traveling West.
- **What do I need to do to get involved?** Just show up with old clothes and waders (if you have them) along with a pair of gloves and we will supply the garbage bags. Email Brian Cowden (brianmag@optonline.net) or sign up at the March chapter meeting. Or just show up on the 17th of April.

COLDWATER CONSERVATION SHCOOL

The NJ School of Conservation in Sussex County will be the host site for an exciting Coldwater Conservation School being offered this year by the NJ DEP Division of Fish and Wildlife and the NJ State Council of Trout

Unlimited and its supporting chapters. The School will be held from June 24 - 27 and is open to youth who will be between the ages of 11 and 15 at the time of the program.

The goal of the School is to foster a knowledge and appreciation of trout and the cold-water habitats on which they depend. Trout are a front line indicator of the health of our streams and environment. Understanding all of the elements necessary for healthy streams and good trout habitat helps students realize the importance of stream and water quality protection, and roles they can play in stream conservation.

Division of Fish and Wildlife biologists and instructors from Trout Unlimited will teach sessions where students will learn about stream ecology, fish habitat, fish biology and identification, aquatic insect identification, fly tying, fly-fishing, conservation law enforcement, riparian forests and stream restoration. There will also be evening programs where students will learn about reptiles and New Jersey's black bears.

The cost of the Coldwater Conservation School is only \$150.00, which includes food, lodging and equipment for the entire 4 days and 3 nights. Space is limited and the application process is competitive.

Information about the Coldwater Conservation School including a brochure and the official application can be found at: http://www.njfishandwildlife.com/conservation_school.htm.

Applications are due no later than April 1, 2010. Students accepted into the School will be notified by the end of April.

Information about Trout Unlimited can be found at: <http://www.njtu.org/> and the NJ School of Conservation at <http://csam.montclair.edu/njsoc/>.

UPCOMING PROJECTS FOR VOLUNTEERS ON THE MUSCONETCONG

The Fred Burroughs/North Chapter has a lot of conservation opportunities to work on Musconetcong tributaries in the upper watershed under the *Home Rivers Initiative*.

If you are interested in learning more or to sign up to help in one of the following areas, please contact chapter conservation chair Glen Zeeck at email address (gzeeck@yahoo.com) or the *Musconetcong Home Rivers Coordinator*, Brian Cowden (brianmag@optonline.net).

MUSCONETCONG TRIBUTARIES PROJECT:

Become trained in visual stream assessments and water quality testing and help to locate and map all tributaries of the main river, perform an initial water quality test using equipment to be provided, and perform a visual assessment using DEP protocols (volunteers needed throughout the watershed, our chapter members would work up north).

This will allow TU and the Musconetcong Watershed Association (MWA) who have partnered on this project to name each tributary, assess it for protection and/or restoration and to perform additional mapping of each trib and electro fishing with

NJ Fish & Wildlife biologists to determine the native trout populations in each tributary. TU and MWA to train all volunteers.

KURTENBACH'S BROOK HABITAT IMPROVEMENT PROJECT:

This Musky tributary is well protected and intact in most of its length. It has an excellent wild brook trout population in the upper reaches, but suffers in the lower stretch of this stream due to being channeled and "hard armored" when Interstate 80 was built in its path.

TU plans to design and implement habitat improvements to the lower stretch of this stream in Mount Olive Twp. (in Stephens State Park) to create undercut banks, pools and woody debris to add habitat. Our goal is to increase the brook trout populations in this stretch to more closely match the populations upstream in the unaffected areas of this tributary.

WILLS BROOK RESTORATION PROJECT:

This 3 pronged tributary lies in Mount Olive Twp. and mostly within the International Trade Zone or ITC Crossings where the Lowes and Wal-Mart are located. It should have wild brook trout in it, but it suffers from a variety of thermal issues that warm the water and make it impossible for trout to survive.

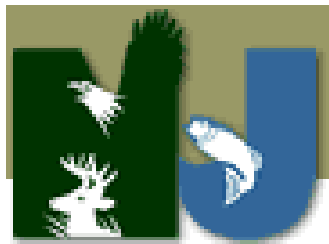

The Hacklebarney TU chapter is planning to assist in temperature and water quality data collection as well as visual assessments of the more than 5 miles of this stream to help determine the various negative impacts affecting this tributary and to prioritize restoration efforts to one day re-establish brook trout from nearby populations such as those in Kurtenbachs

Brook. TU and NJ F&W have electrofished many stretches of this tributary and have found good aquatic life, but water temps too warm for trout year round. We know that the former Morris Canal has had a lasting, negative impact on portions of this tributary, but these problems can be corrected through targeted restoration projects over time.

These are just some of the projects that are planned for the upper watershed near our FSB/North Jersey chapter where our volunteers can get involved.

There are 2 more tributary projects which will likely provide additional conservation opportunities on South of Schooley's Mountain Tributary in Washington Twp. and on Mine Brook which is located in Mount Olive Twp.

Brian Cowden
Musconetcong HomeWaters Initiative

OPEN LETTER FROM THE DIVISION OF FISH AND WILDLIFE

Dear WCC Member,

The Division of Fish and Wildlife began raising and stocking trout in 1912 and began pheasant rearing and stocking in 1923.

Over the course of nearly a century, our trout and pheasant programs have not been merely maintained, but continually improved to the point where they are the envy of many states. The increasing number of nonresidents coming to our state to trout fish and pheasant hunt confirm that.

Rising costs and shrinking staff pose challenges to maintaining the excellent quality of our trout and pheasant programs that everyone, including WCC volunteers, have worked so hard to develop.

Stocking of both pheasants and trout are the most demanding in terms of time and staff yet the stocking regimes largely define the quality and quantity of fishing and hunting opportunities for both species.

Our goal is to explore every option to maintain the current outstanding stocking regimes for both species and the excellent fishing and hunting opportunities those stocking regimes provide.

One of the options we are exploring is the enlistment of WCC members who currently have CDLs to assist with stocking programs by driving stocking trucks.

A handful of reliable volunteer drivers to assist on one or several days each week in the spring and/or fall would go a long way in maintaining the quality of our trout and pheasant stocking programs.

Interested WCC members are asked to reply to paul.ritter@dep.state.nj.us. Those who respond will be contacted with additional information on the application and interview process to be considered for this volunteer project.

CHAPTER LIBRARY

Remember, the chapter is starting a library for the use of all our members. If you have any duplicate, or unwanted books, videos, or DVD's please donate them to the Chapter Library.

You will be able to check out materials just like a library. However, it won't work unless people like yourself donate an item or two.

APRIL SPEAKER: CAPTAIN MIKE CORBLIES

Captain Mike Corblies will be our April speaker. Capt. Mike will be giving the chapter a lecture on fishing salt water from a kayak. He will focus on techniques and locations. Capt. Mike has fly fished for over 50 years throughout the US, Canada, Mexico and the Caribbean. Capt. Mike holds a USCG masters license, a FFF casting instructors certificate, and has held IGFA world records.

In addition, the chapter will be raffling off a Flats Boat Trip for Two with Capt. Mike. So be sure to come to the April meeting to hear a great lecture and possibly win a Flats Trip for Two! The raffle will only be available to those who attend the chapter meeting.

FLY BOX AND DELAWARE FLOAT TRIP RAFFLE

Recently, you received raffle tickets in the mail for the fly box and Delaware Float Trip in the mail. Please be sure to complete them and mail them to Fred S. Burroughs, North Jersey Chapter, Trout Unlimited, P.O. Box 671, Sparta, New Jersey, 07871.

CHAPTER TRIP NEW YORK AUSABLE TRIP JUNE 10-13, 2010

The Chapter will be running a trip to the Ausable in New York from June 10-13, 2010.

We will be renting the cabin and motel rooms at the North Pole. Prices and trip details will be announced at the February Chapter Meeting.

A non-refundable deposit will be required to hold your spot. The trip is first come, first served.

FLY BOX RAFFLE

The Chapter's Fly Box Raffle is going on as we speak. The Fly Box is on display at Ramsey Outdoor's in the Fishing Department.

Please stop by and take a chance on the Fly Box. Who knows, if you will maybe you won't have to tie a fly for a long, long time.

TIC VOLUNTEERS NEEDED

We have received a request from our TIC teacher at the Jefferson Middle school for an "Onion Sack Program" to be presented on Monday, April 26. Normally I would handle it, but I am going to be out of town on that day. If any of you folks can take care of the request please let me know and I'll put you in contact with the teacher. THANKS!

Doug Riley, TIC Coordinator
NNJ (Fred S. Burroughs) Chapter TU
djrfmo@yahoo.com

2010 PEQUEST OPEN HOUSE AND FISHING FLEA MARKET

March 27 & 28, 2010
10 a.m. - 4 p.m. daily
FREE!

Beginning in 1984, the [Pequest Trout Hatchery and Natural Resource Education Center](#) has been opening its doors to the public for the annual **Open House**, which takes place the weekend before Trout Season opens. This event allows the Division of Fish and Wildlife to show off the trout we raise at the state of the art Pequest Trout Hatchery and it serves as a reminder that spring is just around the corner.

Each year, thousands of people come to the hatchery to experience this event for themselves. And each year, the Division of Fish and Wildlife strives to make this a bigger event than the year before.

This event is great for people of all ages and there are so many things to see and do throughout the day. This year's Open House will be March 27 and 28 from 10:00 - 4:00 daily, so plan to join us as we celebrate the beginning of trout season and spring. Bring your families, friends, scout troops, church groups, fishing clubs and anyone else for a fun time in the outdoors.

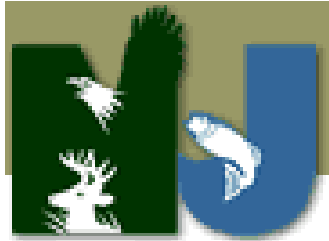

Displays and exhibits await indoors

Peruse the flea market for fishing deals

More information about the 2010 Open House will be posted here in March.

The Pequest Trout Hatchery and Natural Resource Education Center is located 9 miles west of Hackettstown on Route 46 in [scenic Warren County](#). Come for a family or group outing during the Open House or anytime throughout the year. For more information on public or group visitation/programs call 908-637-4125 or see the [on-line schedule](#) of public programs.

VOLUNTEERS NEEDED FOR OPENING DAY CATCH SURVEY

WCC'ers are needed to assist in counting trout anglers and gathering catch information on the opening day of the trout season on Saturday, April 10th, from 8 - 11 am. Volunteers will be assigned a waterbody and will be responsible for counting the number of anglers fishing and also having casual conversations with anglers to document what they are catching. This volunteer activity has been conducted annually since 2005 and is well received by the anglers and is fun to do. The trout-stocked waters that we particularly need opening day information are as follows:

Atlantic County -- Birch Grove Park Pond (Northfield)
Bergen County -- Whites Pond (Waldwick)
Cape May County -- Tuckahoe Lake (Tuckahoe)
Cumberland County -- Giampetro Park Lake (Vineland), Shaws Mill Pond (Newport)
Gloucester /Camden Counties -- Grenloch Lake (Turnersville)
Gloucester -- Mullica Hill Pond (Mullica Hill)
Hudson County -- West Hudson County Park Pond (Harrison)
Hunterdon County -- Alexauken Creek (W. Amwell), Manny's Pond (Union Twp.), Mountain Farm Pond (Lebanon Twp.)
Mercer County -- Colonial Lake

(Lawrenceville)
Middlesex County -- Hooks Creek Lake (Cheesequake State Park)
Monmouth County -- Hamilton Fire Pond (Neptune)
Morris County -- Mt. Hope Pond (Mt. Hope)
Salem County -- Riverview Beach Pond (Pennsville Twp.)
Sussex County -- E/Br. Paulins Kill (Lafayette)
Warren/Hunterdon Counties -- Musconetcong River (Pt. Mtn. Year Round TCA - Port Murray)

If you are interested in participating in this mini-project, please contact Pat Hamilton and let her know which waterbody you can canvass.

If you would like to help, but none of those listed above are convenient for you, let Pat know and perhaps another location can be assigned.

There are nearly 200 trout-stocked waters throughout the state (for a complete listing),

go to: <http://www.njfishandwildlife.com/pdf/2010/trtregs10.pdf>

Once a specific waterbody has been assigned to a volunteer, pertinent information (instructions, forms, etc.) will be sent to each participating volunteer.

HACKLEBARNEY TROUT UNLIMITED

2-DAY FLY FISHING SCHOOL

Need to refine your fishing skills?
Want to escape from the stress of work or school & get outdoors more often?
Have you thought about how you want to spend time during retirement?

LEARN TO FLY FISH

Fly fishing is a great way to enjoy the outdoors, in contact with nature, while pursuing great game fish, such as trout, smallmouth & largemouth bass, pickerel, and saltwater striped bass and bluefish. Invest one weekend absorbing the skills and knowledge needed to catch fish on a fly, and then experience a lifetime of enjoyment and adventure fly fishing your favorite streams, rivers, ponds, lakes, or shores.

When: Saturday, May 1, 2010 9am-4pm; and Sunday, May 2, 2010 8:30am-3:30pm Where: Saturday at the REI store, 280 Rte 10, East Hanover NJ (community room)

Sunday at the Hackettstown Hatchery, 5th Ave & Reese Ave, Hackettstown NJ Who: Beginner, novice, intermediate & new fly fishers, Ages 16 and over.

What: 2-days intensive instruction, use of fly tackle, coffee break, lunch each day Instructors: Knowledgeable fly anglers from Hacklebarney TU with decades of experience Price: \$75 per person (Hacklebarney TU uses proceeds for trout conservation programs)

Register now to reserve your place in the course

E-mail: billsjovall@optonline.net

Phone: 973-769-7775
